

# HALLWAY

## door and partition systems.

Our innovative internal design of SSCORNERSTONE INTERNATIONAL offers edges coated with soft-touch surfaces that you can see and feel. Edge coating, corner protection plates and side channels and angles complement the finishes and eliminate the hazards that can be caused by exposed edges. These innovations and sleek integrated design enhance the strength of our curtains.

### Components

#### 1. Flush header or filler panels.

They are designed to enclose the area above the door and complement the interior system to provide a secure and contemporary look. Filler panels are available in 26 gauge material and the flush headers are available in 22 gauge material. Side and bottom channels are included. Available in glossy white.

#### 2. Soffit system

Soffit installed above the hallway provides an attachment point for hallway lighting. Hallway soffit completes the interior system and provides security above the storage unit.

#### 3. Burglar bars

The burglar bars are galvanized hat channels that provide security for the space above the top of the hallway system or above the unit partition.

#### 4. Corner guards

The corner guards protect exposed corners in the hallway and are available up to 10 ft. Available in 22 - gauge galvanized steel and aluminium diamond plate.

#### 5. Kick plates

Kick plates are installed at the bottom of the hallway to prevent damage cause by tenants moving into the storage unit. Available in 22 - gauge galvanized steel and aluminium diamond plate.

## COMPONENTS CONTINUED

### 6. Roll up doors or swing doors

Our doors are manufactured from 26 - gauge galvanized steel, primed then finished with high gloss silicone polyester paint, available in 10 colors.

### 7. Unit partitions

The partitions that separate the units from each other are typically only visible from within the storage units. 26 gauge metal corrugated partitions can work quite well particularly when braced with 20 gauge top and bottom channels and either a 22 or 20 gauge mid-span reinforcement.

### 8. Roll up frame system.

22- gauge roll up frames featuring 2" returns maximize space and are designed for strength to accept mini roll up doors. Base anchors are included. Available in glossy white.

### 9. Hallway partition

Corrugated 26 gauge panel can be used as a divider partition inside each unit or as a hallway panel to keep costs at a minimum. Mod - U - Wall divider partitions interlock without the use of exposed screws. Angle and channel are included; available in glossy white and galvanized.

## We are everything you need

As an investor or operator, SSCORNERSTONE INTERNATIONAL can help you to accelerate your return on investment. The hallway door and partition systems allow you to effectively take advantage of the area / available space in industrial warehouses.

Thanks to our extensive industry experience we will offer you the best proposal in sizes and quantity of units to be manufactured, always adapting to your space and needs
